

Reproductive Cloning

1. How is reproductive cloning different from therapeutic cloning?

2. Which animals have been successfully cloned from an adult?

3. What problems have arisen from reproductive cloning in animals?

4. Why might people want to create human clones? Give several examples.

5. List arguments for and against allowing human reproductive cloning:

For	Against

6. "Cloning humans goes against God, is completely unnatural and wrong." Do you agree? Give reasons on both sides before stating your conclusion.
